

Checkpoint Learning User Bulletin

October 2018

This User Bulletin is designed to explain software changes made to the latest release of Checkpoint Learning. We've grouped them into sections that best represent the areas that are impacted. The last section of this bulletin covers changes that are tentatively planned for our next Checkpoint Learning software release.

The following new features and issue corrections have occurred in the latest releases. If you have any questions, please contact checkpointlearning.productsupport@thomsonreuters.com or visit the [News & Updates](#) section in the Checkpoint Learning support site.

Enhancements

- An updated design for our Subscription packages (Premier Plus, Premier, Corporate, Professional and EBIA webinars)
- Newly designed My Profile with the ability to set up User preferences for better recommendations
- Autocomplete features for Search on Checkpoint learning

Fixes

- The Calendar feature has been added back to the Search pages
- Issues relating to the launch of courses in Chrome or Safari on iPad have been addressed and courses can now be launched on iPad
- The Webinar participation email now contains more information about locating the login information to connect to WebEx and makes it simpler to join
- Issues with the pop up blocker warning showing up even when the blocker is disabled have been fixed.
